

Scenario 4: Admin Workflow – Managing Collections and Access

Mission:

1. Log in to LuxStudio using an admin account.
2. Navigate to the Admin Center from the main navigation.
3. Open the Access Control panel and view current users and their roles.
4. Add a new user by email and assign a role (“User”, “Admin”).
5. Save changes and confirm that the user is now listed with the correct role.
6. Navigate to the Activity Log and confirm that the role assignment is recorded.
7. Access the Reporting section and view a summary of all reports or abuses.
8. Ban a suspicious user.
9. Navigate to Marketplace API Management. (obsolete)
10. View the list of the most downloaded/trending unapproved modules. (obsolete)
11. Accept or reject the new submission. (obsolete)
12. Connect to Luxoria Sentry to view crash reports and analytics.
13. Access the online feedback collection system (Luxoria Feedback) to view feedback and suggestions from users.

Expected Result:

The administrator successfully accesses the Admin Center and all its sub-sections.
The list of users and roles is correctly displayed, and new users can be added with valid roles.
Role assignments and banning actions are immediately reflected in the system and recorded in the Activity Log.
The Reporting section displays all flagged content or user reports accurately.
Suspicious users can be banned, and the action is logged.
The Marketplace API panel shows pending modules, trending downloads, and allows the admin to accept or reject submissions.
Sentry is accessible and displays up-to-date crash reports and analytics.
The external feedback platform loads correctly, showing new and existing feedback from users.
The system responds with no critical errors or performance issues throughout the workflow.

- 1) After login in with an admin account, this will be the view we have of the app

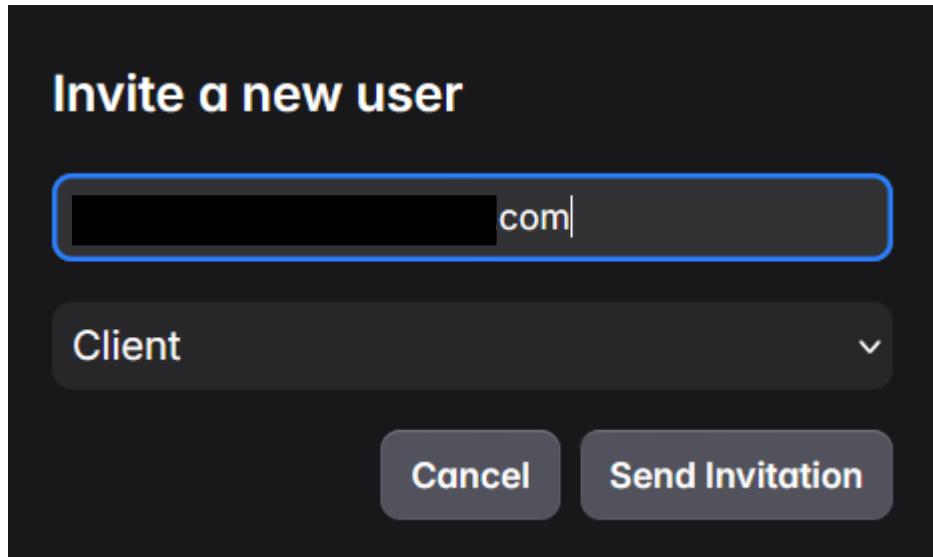

This screenshot shows the 'Your collections' page. On the left, a sidebar menu includes 'Home', 'Collections', 'User Management' (selected), 'Collections Management', 'Activity Logs', 'View Reports', 'Sentry Access', and 'Feedback Access'. The main area displays two collections: 'test' (with one item 'test') and 'luxoria' (with one item 'luxoria'). A search bar at the top says 'Search collections...'. A 'Create collection' button is in the top right. The bottom right corner shows a user profile for 'lucas'.

- 2) We will click on « User management » in the Admin panel on the left side which will redirect us to this page. We can see here all the users in the app and their current roles

This screenshot shows the 'Admin - User Management' page. The sidebar menu is identical to the previous screen. The main area has a table titled 'Admin - User Management' with columns: Username, Email, Role, Blocked?, and Actions. It lists two users: 'lucas' (Role 2, Not Blocked) and 'luxoria' (Role 0, Not Blocked). Each user row has 'Reset Password' and 'Block' buttons. The bottom right corner shows a user profile for 'lucas'.

Username	Email	Role	Blocked?	Actions
lucas	[REDACTED]	2	No	<button>Reset Password</button> <button>Block</button>
luxoria	[REDACTED]	0	No	<button>Reset Password</button> <button>Block</button>

- 3) We can add a user by clicking on « Invite user »

- 4) This will send an email to the person, for him to set his own password and access his account

A screenshot of the Luxoria admin panel. The left sidebar shows navigation options like Home, Collections, and User Management. The main area is titled "Admin - User Management" and displays a table of users:

Username	Email	Role	Blocked?	Actions
lucas	[REDACTED]	2	No	<button>Reset Password</button> <button>Block</button>
quentin	[REDACTED]	1	No	<button>Reset Password</button> <button>Block</button>
luxoria	[REDACTED]	0	No	<button>Reset Password</button> <button>Block</button>

The status bar at the bottom indicates the user is "lucas".

- 5) We then click on Activity Logs in the admin panel on the left side, where we will be able to see that what we just did is recorded

Timestamp	Performed By	Action	Details
7/5/2025, 10:42:19 AM	lucas	Invite User	Invitation sent to [REDACTED] with role Client.
7/5/2025, 10:42:19 AM	lucas	Invite User	Invitation sent to [REDACTED] with role Client.
6/29/2025, 11:16:44 PM	lucas	Delete Collection	Collection 'test' (ID: 0197a6e8-14ea-78cd-b42f-8051c8cac423) deleted.
6/29/2025, 5:09:04 PM	lucas	Invite User	Invitation sent to [REDACTED] with role Client.
6/29/2025, 1:10:31 AM	lucas	Block User	User 'quentin' (ID: 0197b958-b255-723c-a23e-919599346106) was blocked.
6/29/2025, 1:10:30 AM	lucas	Unblock User	User 'quentin' (ID: 0197b958-b255-723c-a23e-919599346106) was unblocked.
6/29/2025, 12:58:42 AM	Unknown	Block User	User 'quentin' (ID: 0197b958-b255-723c-a23e-919599346106) was blocked.
6/29/2025, 12:58:27 AM	Unknown	Unblock User	User 'quentin' (ID: 0197b958-b255-723c-a23e-919599346106) was unblocked.

- 6) In the « View reports » section, we can see all the reports that have been made about a collection or a user

Date	Collection	Reported By	Reason
7/5/2025, 10:44:29 AM	luxoria	[REDACTED]	this is a test
6/30/2025, 12:09:16 AM	test	[REDACTED]	fds

Date	Collection	Reported User	Reported By	Reason	Actions
7/5/2025, 10:44:55 AM	test	[REDACTED]	[REDACTED]	This is a test trying to report a user	Delete

- 7) Mission 9-10-11 are now useless due to a new Luxoria Marketplace

8) After requesting Sentry access, if the request is accepted you will be able to access sentry and view crash reports and analytics

The screenshot shows a detailed error report from Sentry. At the top, it displays the ID: b230b6a6, timestamped 21 minutes ago, with options to copy to clipboard or view JSON. Below this is the Stack Trace section, which includes the error type Microsoft.UI.Xaml.Markup.XamlParseException and a message stating "The text associated with this error code could not be found." A detailed stack trace follows, listing frames from App.xaml.cs, Services\ModuleService.cs, and various internal methods like InitializeComponent and FilterBar.InitializeComponent. On the right side of the report, there are sections for Escalated issues (marked by Sentry an hour ago), First Seen (marked as high priority 3 hours ago), Similar Issues, and Merged Issues.

The screenshot shows the Sentry dashboard's Feed page. On the left, there's a sidebar with navigation links for Issues, Explore, Insights, and Settings. The main area displays a table of recent issues. The first issue listed is a Microsoft.UI.Xaml.Markup.XamlParseException, which has been escalated. Following it are several System.NullReferenceException entries, each with a timestamp, age, trend, event count, user count, priority, and assignee information. The interface includes filters for All Projects, All Envs, and a time range (30D), along with search and save-as buttons.

The screenshot shows the Sentry interface for an error titled "Microsoft.UXaml.Markup.XamlParseException". The main area displays a timeline of events from July 5, 2023, at 10:00 AM to 2:00 PM. A bar chart shows 26 events, 2 users, and 2 releases. Key details include:

- Last seen:** 21 minutes ago
- First seen:** 3 hours ago
- User:** 92% 09265e3b-b6e8-4...
- Release:** 81% 1.0.0 (27b34c889b76)
- Environment:** 100% production
- Level:** 100% error

Below the timeline, a "Stack Trace" section shows a single entry:

```
ID: b230b6a6 21 minutes ago JSON Copy to Clipboard
09265e3b-b6e8-4653-95de-e44b537c0a19 .NET 9.0.6 Windows 11 1.0.0 (27b34c889b76) production
```

The "Highlights" section lists:

handled	no	url	--
level	error	Trace: Trace ID	54494fc9f0514a9ca78a644973c8a19 8

On the right, there's an "Issue Tracking" section with a GitHub link and activity logs:

- Escalated by Sentry an hour ago
- First Seen 3 hours ago

9) Same for the feedback access, after the request being approved, you will be able to view feedback that are made from users through a Office forms
